Docteur Rudy LANZA

www.naturopatia.it

www.federnaturopati.org

In 1974, he coordinated the Italian School of Acupuncture founded by his father in 1968.

In 1985, he founded naturopathy in Italy and organized the first Italian school of naturopathy.

Since 1991, he has also been dedicated to the legal protection of Naturopathic professionals.

Represents the aisbl organization REFORMED for Italy, recognized by the European Parliament for the harmonization of the figure of the Naturopath in Europe.

Organizer of the 1st World Congress of Acupuncture, Florence, 1980 Italy.

Organizer 1st European Congress of Naturopathy, Turin 1991 (Italy).

Organizer of the "3rd Congress of Professional Naturopathy" in Milan on 13-14 March 1999.

Organizer of legal conferences on the legal recognition of the profession of Naturopath and scientific conferences.

Organisateur 2ème INTERNATIONAL REFORMED® SYMPOSIUM aisbl intitulé "Neurosciences, Brain and Non-conventional Medicine", Turin 20-21/10/2012.

Author of the entry "Naturopathy" in the Grand Encyclopedic Dictionary UTET 1997 as well as various texts, articles in national and international newspapers.

- Degree in Psychology from the University of Padua.
- Qualification to work as a psychotherapist.
- Three-year diploma course in Medicine and Surgery.
- Heilpraktiker diploma from the Fachschule Saarbrücken (Germany).
- Diploma of Health Practitioner "Naturopath" at the European College of Holistic Traditional Naturopathy Daniel Kieffer.
- Diploma in Naturopathy at the French Institute of Human Sciences (France).
- Diploma in acupuncture from the Association québécoise d'acupuncture (Canada).
- Diploma in Acupuncture at the Italian School of Acupuncture and Complementary Disciplines (Italy).
- Acupuncture Advisor of the Ordre des Acupuncteurs du Québec (Canada).
- Diploma in Acupuncture at the International School of Traditional Chinese Medicine (Switzerland).
- Diploma of Acupuncture from the International Acupuncture Soc. (France)
- Graduate Certificate in Acupuncture at the Italian School of Acupuncture and Complementary Disciplines (Italy).
- Certificate of attendance at EMDR (EMDR Institute) U.S.A.
- Diploma of "Cardiac Coherence Practitioner", professional training at the I.F.E.D.O. (Montreal, Quebec, Canada), 2020.
- Professor of the Master in Integrative Medicine (University of Florence).
- In 2005 Professor of Naturopathy at the Faculty of Pharmacy of the University of Turin during the Bachelor's degree in Plant Techniques.

Summary

FR /

Autism is a disorder that manifests itself during the first three years of a child's life. In some cases the diagnosis is made late. Symptoms: behavioral disorders, personal isolation, abstraction from reality, high concentration in an inner world, marked mood swings, cognitive problems, etc.

It is precisely a pathology with a lot of symptoms, which is why it is correct to talk about Autism Spectrum Disorders or ASD,

In recent years research has been carried out in several universities in the USA, Israel, Austria, Brasil.

The Italian Institute of Technology in collaboration with the University of California, Irvine has identified the genetic molecular cause of Autism that is related to an endo-cannabinoid produced in the brain. Research continues with the use of CBD (cannabidiol) and THC (tetra-hydrocannabinol): the results are quite obvious with improvements in many of the symptoms of AUTISM Spectrum Disorder ASD.

" Quantum Musical Chromo-Light Therapy helps to free oneself from addiction "

Martine ROUX her training organization file is being studied <https://luminotherapie-formation.com/martine-roux/>

Today, Martine Roux is freed from professional constraints. A second fundamental life: it allows him to live a true, healthy and natural life, where he can finally leave all the room for his fulfillment.

A vocation that has deep roots: Martine has always loved to live in the countryside, in the middle of nature, while listening to her family and friends. She is driven by the desire to bring them her joie de vivre and her knowledge acquired over the years.

After working on light energy for several years, she had the chance to meet Dr. Pierre Fragnay who had already been practicing light therapy for many years.

This meeting was decisive since they brought their skills together around their common passion to develop the Quantum Musical Chromo-Therapy method that Martine now teaches at the Pérolines'M school that she founded in 2013.

From this light therapy it has highlighted its benefits in providing help to addictions. A personalized program is now accessible for everyone

EN / Summary:

This method of weaning by the Light is unique and personalized!

Light is one of the essential elements of life. It has been recognized for many years for providing the natural energy we need.

Addiction leads to a general disorder in the body. Light therapy is a historical and essential solution in this field. Numerous publications confirm it to establish its effectiveness.

Quantum Musical Chromotherapy was created jointly with Dr. Pierre FRAGNAY and Martine ROUX, it allows us to rebalance our vibrational rate, chase away stress and put in a state of well-being to regain vitality and self-control. This technique provides a real and natural help without side effects.

The principle of targeted cellular information allows a fair withdrawal according to the different types of addictions and is made easier.

With less stress, more energy, we regain control and become an actor of our health !!!

It is a non-invasive method where no substance is ingested.

"Impact of drugs on oral health"

Dr Patrick BACHE (ES), President of ADOE, Doctor in Dental Surgery and Medical Kinesiology (ES/CO) associate member REFORMED aisbl read to the Board and Secretary of the Main Board of REFORMED aisbl <http://patrickbache.com/> with 62% of TCER2 at level 7 of the CEC Cv presentation: Dr. Patrick BACHE is a doctor of dental surgery since 1974, he obtained a CES in oral biology and physiology in 1985, followed by numerous trainings in periodontology, master occlusion and posturology in kinesiology at the Faculty of Medicine of Palermo in 200, including various trainings in homeopathy, dental acupuncture, auriculo therapy, aromatherapy and sympathetic therapy. He is currently European Pedagogical Manager branch

KINESIS sp medical kinesiology and director on the board of directors of REFORMED aisbl. Founding President of ADOE association for the development of energy dentistry.

EN / Summary:

The effects of drugs on mouths are multiple, from simple dry mouth to cancer: the action of drugs on the hormonal system (pituitary hypothalamus) promote addiction chronically. Explanation of the main consequences of addictions on buco-dental health and the various disciplines proposed including medical kinesiology and the use of quantum techniques.

Claude-Jean LAPOSTAT (FR)

Member of the Board of REFORMED aisbl responsible for PEDAGOGICAL BRANCH QUANTA (his file is being validated)

Training program in the process of <https://www.life-systeme.com/> validation

Honorary member of REFORMED aisbl

Presentation CV:

Claude Jean LAPOSTAT Engineer by training, my life changed as a result of an illness that required heavy medical treatments. The latter have not managed to stop its progress. During my various researches to improve my state of health and my quality of life, I discovered in Chinese Medicine an effective complementary solution.

Thanks to this I became interested in Alternative and Complementary Medicine, some of which come from Quantum Physics, one of the great branches of modern physics of the twenty-first century. The application of these energetic principles seemed appropriate to me in the treatment of my disease, or in a preventive setting. Today these energetic treatments, including "Quantum Medicine" rebalance many emotional or functional disorders in a simple and effective way while considering the human being in his whole body-mind.

So I created, in Sophia Antipolis/Biot, a technology watch center whose vocation is to promote Energy Therapies and the development of research on connected devices.

The Multidisciplinary Center for Quantum Therapies & Training, founded in 2005 in Sophia Antipolis/Biot, offers in one place to discover innovative techniques through conferences, training and individual workshops organized by committed health practitioners.

Conference: "Cannabis and headaches. In a holistic approach. »

Speaker: Loukas SOUTTO was born in Cyprus. (Training programme being validated in correspondence with NHS in GR) <https://www.nhs.gr/>

Studied at the National and Kapodistrian University of Athens, in the Department of Chemistry.

Specialized in Biofeedback – Bioresonance by the University of Medicine and Pharmacy of Timisoara and specialized in the use of Bioresonance (Scio-reducer).

Studied neuroanatomy. The update of the third millennium of neuroanatomy-bioresonance at the Victor Babe Medical University of Timisoara.

Has a specialization in cessation therapy, by the University of Birmingham. Focuses on the treatment of autistic children, children with hyperactivity and attention deficit.

Studied hypnotherapy at the University of Essex.

He also specializes in distal needle acupuncture (DNA) - TCM Chinese Medicine

Advanced Thai massage therapy treatment by Wat po Thailand.

He studied naturopathy at the NHS for six years and obtained a separate specialisation degree in the following areas:

- Herbalism
- Homeopathy
- Reflexology
- Acupuncture - TCM Chinese Medicine
- Detox and nutrition
- a holistic massage
- Energy nutrition
- Iridology
- Kinesiology
- Bach Flowers-Australian Flowers-Bush Flowers
- Schuessler tissue salts

Attended Professor Park Jae Woo's Su jok therapy classes at Su jok Academy in Moscow.

Specialization in biodynamic breathing and trauma release (bbtrs).

Specialization in homotoxicology with the Hellenic Homotoxicological Association.

Practical training at the Metropolitan Hospital of Athens – Therapeutic Clinic of Athens – Onaseio Hospital. Member of the research team of the Onaseio Hospital in the field of reflexology, where today the results are applied by the major cardiosurgery centers of the world.

Practical exercise at the Traditional Chinese Medicine Hospital - MTC Chinese Medicine in Shanghai.

Director of the Eductor Holistic Health Center in Cyprus.

Member of the Greek Herbalist Association.

Member of the Cyprus Naturopathic Association.

Member of the Greek and European Homotoxicological Association.

Balens European Security in Work in Alternative Therapy.

Member of the European Association of Naturopathic Medicine

Member of the European Association of Integrative Medicine.

Member of the professional trade union for complementary medicine – non-conventional (Ε.Σ.Σ.Ι.Α.Σ).

Summary video : <https://youtu.be/jgrv3ik4KPs>

Conference: " Addiction is a disruption of homeostasis and information "

Speaker :(FR)

CV: Dr Christophe GIRARDIN ANDREANI (training program is 100% of the TCER1 level 4 of the EQF for the EEA BRANCH sp NATURO)

<https://phytocorsa-formation.com/>

Founder of the Phytocorsa association, Christophe Girardin Andreani has been teaching natural approaches to health for more than 20 years now. A dental surgeon by training, it was from the beginning of his medical studies that Christophe understood the need for a more holistic approach to therapy. It is therefore after decades of research work and several theses that he became a teacher in phytotherapy at the University of Paris 13, before founding his own school, Phytocorsa.

Summary

EN/

The main cause of addiction is a breakdown in homeostasis, a subtle balance based on multiple mechanisms, some of which such as neurotransmitter interactions, circulation of nerve impulses, ionic regulations, endocrine self-regulation, immune mechanisms, have been studied and known for a long time.

Others, such as the ECS or endocannabinoid system, have only just been discovered and not yet revealed all their secrets.

Others have only just been highlighted, such as the non-electromagnetic connection that regulates the internal functioning of microbiota and the interactive exchanges governing the microbiota between them, intestinal microbiota, skin microbiota, neuronal microbiota, mitochondrial microbiota. All these exchanges are based on the communication mechanisms between all bacterial structures, whether considered in the strict sense of microorganisms or in a more elaborate form, mitochondrial or chloroplast.

Addiction is in fact only the perversion of desire, the destruction of the survival instinct and the negation of any concern for the cessation of suffering. It is negation of Life and in this sense can be one of the worst pathologies there is. At its peak it is nothing other than a programmed suicide.

Understanding how all informational mechanisms work can be a promising therapeutic avenue for healing.

Dr Christophe Girardin Andreani, Teaching Director of Phytocorsa Ecole

"Pain, pain, the contribution of essential oils "

Pierre FRANCHOMME (FR), aromathologist, naturopath, researcher, international speaker? LABORATORY LAB PIERRE FRANCHOMME <https://www.pierrefranchomme-lab.com/>

CV presentation:

Pierre Franchomme is a French researcher he is before all aromathologist and pharmacologist, but also Naturopath he studied with Pr PV MACHESSEAU. He is in France at **the origin of the democratization of essential oils in their therapeutic use** in the 70s. It is largely thanks to him that today they can be used safely, with full knowledge of the facts. He also at the origin of the notion of chemotype so important to be able to determine with certainty which species is the Thyme or *Thymus vulgaris*, which alone brings together at least 7 different species for practical use well determined in all these works of which Aromatherapy exactly was the reference until its new reissue in the form of a collection AT THE TIP OF AROMATHERAPY, Tom1: **"THE SCIENCE OF MEDICINAL ESSENTIAL OILS"**

EN / Summary: pending

Conference: "Neurogenesis, Nutrition and the Role of Cannabinoids"

Speaker :(GR) <https://www.nhs.gr/>

CV : Dr. GEORGIA KATSOGRIDAKI

Bariatric Nutritionist - Physiopath

2005: Bachelor's degree in Dietetics & Nutrition

2009 : Master Biochimie

2014: Homeopathy

2018: Doctor of Philosophy

2019: Hippocratic Nutrition

2020: Naturopathy

Summary

EN/ Your brain is functioning well below its capacity. It deteriorates much faster than necessary. Recent discoveries in the emerging field of neurogenesis reveal the secrets to radically improving your brain health. You can access a higher level of skills at any age and far beyond your initial abilities.

Improving diet and lifestyle will improve your memory and brain abilities, protect you from stress and depression, prevent or delay cognitive decline, dementia and Alzheimer's disease, enrich your relationships and sex life, help you connect with your loving peace center.

"Addictions: the answer in gemmotherapy "

CV : Mr Philippe ANDRIANNE BE file in progress validation LEVEL 3 CEC BRANCH HERBO <https://www.feh.be/>

He studied botany at the University of Liège.

He worked for a few years in a pharmaceutical laboratory specializing in homeopathy. His job was to harvest and prepare medicinal plants. He was then hired by a laboratory manufacturing food supplement. As a result of these different experiments, he founded his own laboratory. He began to study medicinal trees and buds.

He is currently a member of the Advisory Committee on Herbal Preparations of the Belgian Ministry of Health. He is president of the Belgian Federation of Herbalism. He is also a lecturer in the field of herbalism and medicinal plants.

EN / Summary or presentation video.

Gemmotherapy, founded in the 60s by Dr. Pol Henry, uses buds and young shoots in a fresh state, prepared 1/20th in the form of concentrated glycerine macerate.

Because of the remarkable potential of plant meristems that contain all the medicinal properties and the energetic aspect of the tree, gemmotherapy was initially called by its founder "phytembryotherapy".

Several buds are involved in psychosomatic disorders, depression, anxiety, including the fig tree which will be presented in an integrated way in combination with other nutrients and plant extracts. Several protocols will be proposed in some practical cases, in particular "sugar" addiction.

"Endocannabinoid system and mechanisms of action of phytocannabinoids"

Cv summary presentation

Doctor of Pharmacy, Expert in Digestive Ecology, Managing Director of PARINAT (Independent French Company specialized in micro-nutrition), Member of the Catherine Kousmine Foundation (Switzerland). <https://www.parinat.com/>

EN / summary The cannabinoid system is a complex system, involved in many vital functions, especially in the homeostasis of the body in the face of external stresses. This system is also the target of Cannabis sativa's cannabinoids, primarily THC. But today, other exogenous cannabinoids are experiencing a huge commercial craze: CBD and its derivatives. We propose to examine the mechanisms of biological action of these non-psychoactive phyto-cannabinoids, for a better understanding of their potential effects on "Well-being".

"Study of emotions through health through touch (TFH): Analysis of the laws of the wheel according to muscle responses"

(FR / H / BE / IT Thierry WAYMEL file in progress validation LEVEL 4 CEC BRANCH KINESIS

Cv summary presentation

Kinesiologist and Physical Trainer

Director of Inforted

FFK TDP

Designer of sports kinesiology

Author of several books on muscle stretching

EN / Summary or presentation video.

Presentation of a practical case of alcohol addiction, and balancing by tfh with postural writing.

It is from the Touch For Health (TFH), this non-medical system of balancing posture, attitude and vital energy that my curiosity pushed me to take a deeper look at the existence of the laws related to this method. For more than 20 years, I have compiled data that has allowed me to make very deep connections in the analysis of laws: thus, the "dams", "noon/midnight", "triangles" and "squares" are revealed before our eyes and in each of the wheels from a new angle. Because beyond the existing symbolic and anatomical links, it is a question of understanding the stakes and the impact of these laws on human biomechanics and the associated anatomical application. This study makes it possible to demonstrate at the moment " T " the impact of the objective and the associated stress by putting the client at the heart of his balance.

I named this program "Dynamic Postural Writing."

The fruit of this reflection leads me today to the realization of a work that could be put at the service of all kinesiologists.

To carry out this project, it seemed interesting to me to call on my colleague Élodie Cabrera whose qualities as an editor and knowledge bring a complementary look to my study. Previously in charge of

communication, now a professional kinesiologist and instructor in my Training Center Inforted, our paths crossed during her student career.

We would be happy to present this book as soon as it is published in 2023.

Thierry Waymel & Elodie Cabrera

" Treatment of addiction through hypnosis"

**(ES) Mr. Josep MANOGIL file in progress validation BRANCH PSYCO sp HYPNOSIS
CV summary presentation**

Clinical hypnotherapist, naturopath, homeopath, NLP master trainer, leadership coach and expert in mediation and communication. Hypnotherapist recognized by the American Association of Professional Hypnotherapists (U.S.A.) and member of Die Deutsche Gesellschaft für Therapeutic Hypnosis und Hypnos Forschung (Germany). He teaches clinical hypnosis and NLP throughout Spain and has appeared in numerous radio and television programs in Barcelona, Madrid, Malaga, Tarragona, and Valencia. In June 2014, the first edition of his book Hypnosis and Personal Excellence went on sale. He has also published several recordings of his seminars on YouTube.

He has trained and leads his own therapeutic teaching team, gathered at the CEMTA ESYEH Institute.

EN / Summary or presentation video.

Hypnosis has several protocols for the treatment of addictions. In general, aversive therapies are used, although disconnection and saturation therapies are also used. The procedures that will be studied are those of the treatment of addictions to cooking, heroin, alcohol, tobacco, cannabis and gambling, which will serve as models for the rest of the cases.

It is important to emphasize that to apply aversive therapy, the hypnotist must necessarily be in a deep hypnotic state, and dissociated so as not to be affected by the suggestions. The most complex treatment is that of cocaine, the others are adaptations of the same protocol to different addictions.

«The neuroemotional approach to addiction and how to free oneself from it»

Roméo COURNAL

CV summary presentation

Coach trainer specialized in applied neuroscience. I accompany managers in depression or burnout to find sleep, energy, efficiency without medication, without a shrink session and without personal development <https://romeocournal.fr/home>

EN / Summary or video presentation.

According to the neuro-emotional approach, a person is never so addicted to one substance, one. Behavior or a person that to the neurochemistry it provides. It is on this paradigm that so-called derivative therapies are based.

By focusing on the different "needs" that an addictive practice fills, we find almost systematically a dopamine deficiency. This deficiency is caused by overconsumption or too little production of this essential neurotransmitter. The neuro-emotional approach plans to look for the triggers and causes of this deficit.

During this conference we will see how by defusing neuro-emotional conflict, we come to make addictive behavior obsolete and even prevent relapse.

« Neuroscience, addiction and cannabinoid »

FR Pierre DAVEZE

« CANNABINOID USE & ABUSE/ADICTION:
THE VALUE OF AYURVEDIC MEDICINAL PROSPECTS »

JP/ LK Dr. Pandith SUJEEWA JAYASUNDERA

CV summary presentation

I am a hardworking healthcare professional with over 30 years of experience as a doctor in Ayurvedic medicine. I specialize in medical consultation and treatment for. Paralyzed patients, clinical neurology and spinal cord disorders, Reiki healer, counseling for depression and anxiety disorders and Panchakarma physical training
Therapists and production of Ayurvedic medicines

.EN /abstract

The use of hemp (Cannabis Sativa) dates back to antiquity. The ancients used hemp to boost immunity, flavor food, and protect the body from the cold. During the 18th - 20th centuries, European and Western nations have made effective products such as rope, paper, clothes, oil, etc. using the hemp plant.

2600 years ago, "Lode Gautama Buddha" had pointed out in the Tripitaka the bad/ harmful effects of the use of Alcoholism and Prohibited trading etc. In Ayurvedic Moola Samhitas' = Text Books (Vruddha Tria) alcohol and

Alcoholism are discussed in depth. In the 7th century, Ayurvedic medicine expert Nagarjuna Thera compiled a large number of prescriptions for flavoring herbs/ Cannabis sativa and detoxification methods of hemp and opium (Papaver Somniferum L.) that work on the nervous system in a way that suits the human body. Hemp mixed yogas/ formulas in the 17th century Bhava Prakasha; In addition to the systems that cause diseases, there are also many herbs and Cannabinoid formulas for developing sexual energy and Aphrodisiac defects. Unfortunately, since 2-3 decades school students and young people have been abusing/addicting opium and hemp as a perverted drug. Producing and distributing detoxicated hemp-based medicinal has the potential to generate more effective profits than the immediate financial gains of the crooked individual.
